

Account Creation

To personalize your experience and take full advantage of features such as saving frequented routes, setting accessibility preferences, and calculating accurate lifestyle metrics, you will need to create an account.

Creating an Account

1. On the home page of the accessible map, click on the hamburger icon to open the menu.
2. From the menu, select **Sign In**.
3. Once on the Log In page, click the link at the bottom of the page “Don’t have an account? **Sign Up**”.
4. Fill out the required fields with your email address, name, and new password.
5. Click the **Sign Up** button to create your account.

Logging In with an Existing Account

1. On the home page of the accessible map, click on the hamburger icon to open the menu.
2. From the menu, select **Sign In**.
3. Enter your email ID and password.
4. Click **Sign In**.

Routing

This guide will walk you through how to select a start and end location, view available route options, and follow the route to your destination.

Standard Routing

1. To enter a start and end location, click or tap the start and end text boxes.
2. If you would like to search a location by name or address, start typing the location. Or, you can simply drop a pin on the map as your location.
3. Once a start and end location are entered, a selection of routes will open to the left of the map.
4. Select between the routes to see the path on the map, or tap the paths on the map to switch between routes.

5. After selecting a route, click or tap the **Start** button to begin routing.

Accessible Routing

To enable accessible routing, click or tap the settings gear icon at the bottom of the map. The accessibility tool bar will open, displaying three icons. Click or tap the wheelchair icon to enable accessible routing.

Once accessible routing is enabled, accessible entrances will be marked on the map, and all routes will be accessibility friendly.

Bookmarked Routes

Bookmarked routes are an available function after creating an account. Bookmarked routes allow you to save your preferred and frequented routes across campus.

Bookmarking a Route

1. Log in to your account.
2. Enter a start and end location by typing in the text boxes or placing a pin on the map.
3. Route options will appear to the left of the map. Click or tap on the bookmark icon on the route you wish to save.
4. The bookmark icon will turn yellow, indicating the route has been saved.

Routing from a Bookmarked Route

1. To access the routes saved on your account, click the bookmark icon in the top right corner.
2. A list of your bookmarked routes will appear to the left of the screen.
3. Click or tap the route you want to use and press **Start**.

Accessibility Tools

Accessible Entrances

If you require access to accessible entrances, enabling the accessible entrances setting will mark and route to these entrances only. This setting can also be enabled permanently if you have an account.

1. On the home map page, find the accessibility toolbar at the bottom of the map.
2. Click or tap the wheelchair icon to enable accessible routing.

Voice Directions

The voice directions tool...

High-Contrast Mode

High contrast mode is available within the app and is a setting that can be applied permanently if you have an account.

1. On the home map page, find the accessibility toolbar at the bottom of the map.
2. Click or tap on the contrast icon to enable high-contrast mode.

Account Preferences

Settings and preferences can be saved to your account and available each time you log in and use the map. To change your account preferences:

1. Click the menu icon in the top right corner
2. Select **Preferences**
3. The preferences page will open, displaying your account name and login information, accessibility preferences, and lifestyle preferences

Map Accessibility Preferences

Use Accessible Routes – marks accessible entrances and uses accessible routes

Screen Reader – Will read out the direction steps starting a route

High Contrast Mode – Enables high contrast mode throughout the site

Lifestyle Preferences

Height and Weight – Takes in your height and weight to be used in calculating calorie and steps estimations

Prioritize Longer Routes – An option to default the longer route first
